## **1. Agenda Approval for Open Session**

The Agenda was approved as presented.

## **2. Status Reports**

-TAC

The TAC has been dormant.

- Other industry groups (IETF, ITU)

The IETF ENUM work group is moving towards closing down but there will be at least one more meeting. Works includes provider ENUM drafts and procedures for new enumservices.

The ITU has been informed by RIPE-NCC that it plans to implement DNSSEC in the e164.arpa domain.

CIRA is seeking a new CEO.

- End-user trial report status

The LLC is seeking to finalize the report by the September meeting and the Trial Director has been working with the TPAC to add some additional test data.

- Provider Trial Update

The trial is now in the reporting phase. The LLC expects some portions of the report will be made public

#### 7. Q&A

It was asked how the LLC planned to move forward with user ENUM. The answer is that this will be handled in conjunction with the trial report. Some issues may be resolved through an industry group such as the ENUM Forum or by the US Government . Input is sought.
